

TOP 5 REASONS

Why Epson Inkjet Printers Are Amazing for Business

Only Epson takes its commercial-grade PrecisionCore® inkjet technology and brings it to everyday business color printing for unrivaled, hassle-free performance.

Only Epson Business Inkjet Can Give You:

- 1 Innovative industrial printing technology**
Epson's award-winning commercial-grade inkjet technology, PrecisionCore®, is built into its family of business-class inkjets. The unique MicroPiezo® ceramic printhead delivers both speed and professional-quality output.
- 2 Lowest-cost color printing in its class**
The WF-C869R has the lowest color printing cost in its class,¹ and its Replaceable Inkpack System delivers up to 84,000 ISO pages before changing the ink packs, which means fewer interventions and less hassle.²
- 3 Unbeatable speeds without compromised quality**
The WF-C20590 has print speeds of up to 100 ISO pages per minute³ (fastest in class)⁴ so a high volume of work gets done very quickly. It's what's inside that counts; the PrecisionCore® technology delivers breakthrough speed and professional-quality output on a wide variety of specialty media, as well as plain paper.
- 4 Hassle-free printing and serviceability**
Inkjet technology is less complex than laser technology, with fewer serviceable parts for lower maintenance.⁵ Epson inkjet printers are designed for high reliability and optimally designed for business applications.
- 5 Up to 50% less power**
The WorkForce Enterprise WF-C20590 color MFP utilizes up to 50% less power than color lasers.⁶
